DETAILED ACTION

Allowable Subject Matter

1. Claims 22-26, 28-35, and 39 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant claims are patentably distinguished from the Taschek, Bailey, Jr. et al., Werth, and Kerrebrock et al. patents for the reasons already established on the record. Furthermore, the following notes are made with respect to the other documents having an "X" designation on the International Search Report: DE 19734259 does not anticipate or render obvious the claims because it teaches high temperature operation ($>450^{\circ}\text{C}$); Eidensohn (3,133,837) does not anticipate or render obvious the claims because it teaches an alkaline fuel cell (which operates at about 150°C), and does not teach a water vapor generator per se; and the Aiello et al. publication does not anticipate or render obvious the claims because it teaches the use of steam, which is excluded by the claimed temperature range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
